# The WorkCell

by Frame Innovations · Spec sheet

## Part to print, worry-free.

A fully autonomous two-printer cell: it prints, clears the bed, stores each part in its own slot, loads a clean plate in under a minute and tells the owner where their part is.

**~$5k**
all-in, both printers

**<60 s**
between prints

**214 h**
hands-off record

**300×300**
mm build area

| | |
|---|---|
| Price | ~$5,000, both printers included |
| Printers | 2 × Voron 2.4 running Klipper |
| Build volume | 300 × 300 × 300 mm per printer |
| Plate bank | 15 magnetic, swappable plates |
| Storage | 32 shelf slots at 30 mm pitch, sized to each print |
| Swap time | Under 60 s, print to print |
| Filament | 4 kg per printer, 8 kg on board |
| Footprint | 1.04 × 0.99 m, 1.66 m tall, on casters |
| Power | Standard wall outlets: 1 plug for the cell, 1 per printer |
